## BrightSourced Energy’s Historical Energy Audit Service recovers over £500,000 for Barts Health NHS Trust on a 2<sup>nd</sup> Pass Audit

Barts Health NHS trust is the largest NHS Trust in the UK and operate from four major hospital sites. As well as district general hospital facilities for three London boroughs, they have the largest cardiovascular centre in the UK, the second largest cancer centre in London, an internationally-renowned trauma team, and are home to the London Air Ambulance.

Through an existing and successful partnership with BrightSourced Energy for their water procurement, they engaged BrightSourced to carry out historical auditing for their electricity, gas and water bills.

### The Brief:

Barts Health NHS trust were keen to engage the services of BrightSourced Energy to undertake an historical energy audit, after the success they delivered in procuring a new water contract for Barts. They had done an energy audit in the past with another company, so this was a 2<sup>nd</sup> Pass Audit, a test BrightSourced Energy were not afraid to take on.

### The Success:

Through a robust analysis process evaluating and scrutinising 6 years of utility data, BrightSourced were able to recover in excess of £500,000 of overcharges. These included -

- Wastewater abatement
- CCL and VAT
- Standing charges
- Supply capacity
- Combined heat & power overcharges
- DUoS charges

“Through a successful partnership with BrightSourced for our water procurement, we decided to employ their services to carry out an historical energy audit across all 3 utilities.

They managed to recover circa £500k of overcharges. We couldn’t of been happier with the results which proved once again that BrightSourced deliver on their promises”
