

## Are you being charged correctly for your commercial water?

Commercial water bills can be both complex and multi-faceted. If you have many different processes and multiple sites, the more complex the bills can become making it increasingly difficult for clients to know whether they are being billed accurately or fairly.

### WHAT IS WATER BILL VALIDATION?

With so many factors making up your total bill, such as volumetric water, waste water, drainage costs and fixed water charges, there is plenty of scope for error. At BrightSourced our highly trained team of auditors have years of experience in cost recovery.

By comparing historical billing with water use, we ensure that you only ever pay for what you have used.

Our Water bill validation service can be broken down into three parts:

- Scrutinising and evaluating your past paid utility bills to identify any errors
- Negotiating with your utility supplier to ensure any recoveries are passed directly onto you
- Continue to monitor your bills to ensure you never pay more than you should

With 1 in 3 water utility bills containing miscalculations can you really afford to not take action?

To find out more about our water bill validation service, contact our specialised team of auditors on 01253 851818 or email [info@brightsourced.com](mailto:info@brightsourced.com)

“Through a successful partnership with BrightSourced for our water procurement, we decided to employ their services to carry out an historical energy audit across all 3 utilities.

They managed to recover circa £500k of overcharges.

We couldn't of been happier with the results which proved once again that BrightSourced deliver on their promises”

Mr Bradley Royden-Jones  
(Senior Procurement Lead)
